## DETAILED ACTION

### *Election/Restriction*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to an insulin-containing medicine for peroral use containing insulin and an auxiliary substance.

Group II, claim(s) 7-12, drawn to a method for derivation of insulin-containing medicine for peroral use, including the excretion of erythrocytes from fresh mammal blood etc.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Group I's composition which is drawn to an insulin-containing medicine for peroral use containing insulin and an auxiliary substance is mutually exclusive from Group II's method which is drawn to a method for derivation of insulin-containing medicine for peroral use, including the erythrocytes from fresh mammal blood etc.. Thus, the special technical feature of Group II is missing from Group I, and vice-versa and therefore, there is no Unity of Invention between Group I's

composition and Group II's method (i.e, Group II's method comprises of steps (i.e., of different temperatures and/or time and/or amounts and/or active ingredients) different from of what Group I's composition requires).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
